DETAILED ACTION

Allowable Subject Matter

1. Claims 1-22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Although the prior art discloses a radiation therapy device comprising a source carrier arrangement carrying radioactive sources and a collimator body comprising collimator passages, wherein a subset of the radioactive sources is linearly displaceable relative to a subset of the collimator passage inlets, it fails to teach or fairly suggest that a subset of the radioactive sources is linearly displaceable relative to a subset of the collimator passage inlets from a first relative position, in which radiation from the subset of radioactive sources is received by a first plurality of collimator passage inlets, to a second relative position, in which radiation from the subset of radioactive sources is received by a second plurality of collimator passage inlets, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments filed 18 March 2005 with respect to the drawings have been fully considered and are persuasive. The objection of the drawings has been withdrawn.

Art Unit: 2882

4. Applicant's arguments filed 18 March 2005 with respect to claims 9, 12, 13, and 19 have been fully considered and are persuasive. The rejections of claims 9, 12, 13, and 19 under 35 U.S.C. 112 second paragraph have been withdrawn.
